LOLA DOLINSKY | Frontend Engineer

Denver, Colorado • 918-693-2230 • dolinsky.lola@gmail.com • LinkedIn • GitHub • loladolinsky.com

PROFESSIONAL SUMMARY

Frontend engineer with 5+ years of experience building customer-facing web applications and shared UI systems with TypeScript, React, Next.js, and Vue. Owns features end to end, from design to release, with a focus on accessibility, performance, and observability. Fully remote since 2021, using AI-assisted, test-verified workflows.

SKILLS

Languages & Frameworks: TypeScript, JavaScript, React, Next.js, Vue.js, Node.js, REST APIs, HTML, CSS, Tailwind CSS

Testing & Delivery: Vitest, React Testing Library, Vue Testing Library, Playwright, Cypress; unit, integration, E2E; CI/CD

UI Systems: Design systems, Storybook, Figma, component architecture, accessibility (WCAG), responsive design

Performance & Observability: Datadog RUM, FullStory, Core Web Vitals, session replay, API latency monitoring

AI-Assisted Development: Agentic workflows for task breakdown, implementation, and verification

EXPERIENCE

Light Studios LLC — Frontend Engineer (Contract)

Remote | April 2024 – present

- Own client web projects end to end, from requirements through launch, using React, Next.js, and TypeScript.
- Build reusable, accessible UI features with an emphasis on maintainability, performance, and SEO.
- As sole engineer, rebuilt an insurance firm's WordPress site in Next.js and TypeScript, reaching **Lighthouse 95+ in every category** with zero layout shift and **50%+ monthly active user growth** since relaunch.

LeafLink — Frontend Software Engineer

Remote (New York, NY) | October 2021 – January 2024

- Shipped customer-facing Payments Portal features with Vue.js, TypeScript, and REST APIs.
- Maintained the company-wide, cross-platform Storybook style library, unifying UI across **3 applications** with reusable Tailwind components.
- Maintained **80%+ test coverage** with unit, integration, and end-to-end tests (Vitest, Vue Testing Library, Cypress).
- Helped build a hackathon-winning Datadog Real User Monitoring dashboard tracking Core Web Vitals, user friction, API latency, and session replays; instrumented custom user actions and identified and fixed the bugs they surfaced.
- Integrated FullStory to give product teams insight into user behavior and friction points.

Rocket Software — Software Engineer Intern

Denver, CO | June 2021 – August 2021

- Developed accessible frontend components and data visualizations for a performance monitoring dashboard.
- Helped resolve a frontend build bottleneck, contributing to a **28% improvement** in build time.

PROJECTS

Portfolio — loladolinsky.com

Next.js 16, TypeScript, Playwright, React Three Fiber

- Vitest and React Testing Library unit tests; Playwright end-to-end and axe accessibility tests on Chrome and iPhone WebKit, in CI.
- Fixed a mobile-only lightbox bug with a native <dialog> rebuild, guarded by a Playwright regression test.
- Built with an agentic AI workflow: reviewed steps, each change verified in the browser and by tests.

EDUCATION

Diploma in Frontend Engineering | Turing School of Software & Design — Denver, CO

M.A. in Speech-Language Pathology | University of Tulsa — Tulsa, OK

B.A. in Linguistics | University of Colorado Boulder — Boulder, CO
